

# MATTY White hulled

Early, yield, quality

## Advantages:

- Earlier ripening, very good standing power, good overall disease resistance
- Unique combination of big grain size, very low hull content and high hectolitre weight
- One of the highest yielding oat varieties the last years in Finland
- Excellent groat yield potential

## Cultivation:

2016 in large scale tests for oat milling in Europe

## Short profile:

---- = very low resistance/early/short,

+++ = very high resistance/late/long
